In the last cases, there is talk of "color cut", in the past used to distinguish religious or valuable books from the remaining editorial production, using a sponge soaked in entering inks (70-80 years of the twentieth century) [40] Since the late nineties they have remained on lips with colors based â € ‹â €‹ in water. Disambiration: If you are looking for other meanings, see the book (disambigue). Whether they were made of papyrus, parchment or paper, the rolls were the dominant form of Hellenic, Roman, China and Judicial Culture books. The illustrated cover at ancient now covered the consequent Strodus, a brochure printed in Venice by Bernardo da Lovere in 1484. [38] Rarely used to the whole 18th century (when the editor generally sold unfortunate books or applied a simple cover of protection of protection , which was then thrown by the Bander) became very popular from the beginning of the 19th century, perhaps due to the impulse of Brassur's printers in Parage. [39] In the old book could be covered with various materials: parchment, leather, canvas, paper and wood or cartoon. With the mechanization and propagation of the typical industry, other types of ligatures and blankets, more economical and appropriate for automatic processes are introduced. In Theory, in Egypt, Earth Papyrus Plant, the code of the papyraceos should have reigned supreme, but it was not so: the parchment code appears in the area at the same time as the papyrus, in the second century AD. Although the eleven codes of the Bible dated in that century were Papyracei, there are about 18 codes of the same century with pagan writings and four of these are in parchment. [19] In addition, an interesting letter is provided by a letter from the time, which is in an Egyptian village: a son writes to the father that "Deios came to us and showed us the six codes of parchment". The history of the book follows a series of technological innovations that have improved the quality of text storage and access to information, portability and cost of production. On the other hand, based on the annotations of Libanio, an intellectual of the fourth century who in his multiple activities was also the legal master, it is learned that the textbooks of his students were parchment codes. In ancient luxury books, they can be in variable numbers, from two to four (rarely more), both at the beginning and at the end. The wax tablets were wood-covered components with a layer often on the side that was engraved by an optical pencil. They found "four" containing up to ten tablets. The history of the book continues to develop with the gradual transition from the roll to Codex, moving from the Near East of the II-II Millennium BC. In the first Byzantine period, during the fourth and fifth century AD, when the spread of Christianity and monasticism changed the course of the book's history fundamentally. For a long time it has characterized the publication for childhood and today, covered with a "supercope", constitutes the characteristic feature of the main editions. However, the use of electronic books rather than printed books was extended only in the early 21st century.
