The unique full color layout is enhanced with an immense number of illustrations, figures, tables, and color photographs.Key features:Modernized to reflect changes in the past 20 years including electronic scanning antennas and high resolution covers the wide range of techniques used in modern radars of air and space origin. The bases are applicable to land and sea radar. The clear and understandable writing complemented with a broad graphical illustration of concepts and offset boxes that carry those concepts to the next level. Community reviewed by over 100 radar experts from organizations worldwide. The authors clearly understand their audience, and have produced a job that will quickly become essential to anyone who wants to understand the air radar. '-Darren Coe, MSc CEng, MIET, Senior Scientist - Airborne Radar, QinetiQ Malvern Send or shareTrending In books Most important reviews Most recent Reviews Completely modernized, expanded, but retaining all the magic of the 2nd edition, Introduction to Airborne Radar has been carried to the 21st century without losing the stamps that made the previous editions of George Stimson unique. The true essence of Stimson is found in high-quality illustrations, direct writing style, and the ability of readers to use both to quickly understand the concepts within each chapter. Review Quotes 'For radar experts and fans there is a lot here to expand understanding of the latest concepts and techniques. Practically anyone with an algebra knowledge of secondary, trigonometry and physics will be able to read and absorb the vast majority of the material. The clear and understandable writing complemented with a broad graphical illustration of concepts and offset boxes that carry those concepts to the next level. "On this title" may belong to another edition of this title. The authors clearly understand their audience, and have produced a job that will quickly become essential to anyone who wants to understand the air radar.' Radio is the technology of signaling and communicating using radio waves. Radio waves are electromagnetic waves of frequency between 30 hertz (Hz) and 300 gigahertz (GHz). They are generated by an electronic device called a transmitter connected to an antenna which radiates the waves, and received by another antenna connected to a radio receiver.Radio is very widely ... 16/06/2022 - James | The latest defence and security news from James - the trusted source for defence intelligence
